

Objetivo

O curso tem por objetivo discutir temas selecionados em teoria econômica pós-keynesiana, entendendo teoria pós-keynesiana a partir da definição de Lavoie (2014) em que são incluídas diversas correntes (Fundamentalistas, Kaleckianos, Sraffianos, Kaldorianos e Institucionalistas). A discussão dos temas consistirá em uma apresentação tanto da teoria, quanto das aplicações, como, por exemplo, modelos econométricos, modelos stock-flow e modelos de simulação. Procura-se, com isso, fornecer ao aluno um quadro atualizado – teórico e da pesquisa aplicada – em temas relevantes no âmbito da teoria pós-keynesiana. O curso funcionará sob a forma de seminários e contará com a participação de outros professores do PPGE, assim como docentes de outros programas.

Programa

- A Macroeconomia pós-keynesiana: características gerais

- Demanda agregada, PIB, Produto potencial

- (1) O produto potencial no debate macroeconômico
- (2) A contabilidade do crescimento: Oferta e demanda
- (3) Crescimento e Distribuição
- (4) Debate sobre a determinação do investimento
- (5) Consumo e endividamento

- Inflação, Regimes Inflacionários, Crescimento e Desemprego

- (6) Inflação de custos em uma economia aberta e fechada
- (7) Inflação rastejante (*creeping inflation*)
- (8) *Strato-inflation*, Alta Inflação e Hiperinflação
- (9) Regimes inflacionários e crescimento econômico
- (10) Inflação e Desemprego: o debate em torno da NAIRU e suas mudanças nas últimas três décadas

- Política Econômica e avaliações

- (11) Visões pós-keynesianas sobre o Novo Consenso e o regime de metas de inflação
